EDUCATION

Bachelor of Technology in Computer Science (specialisation AI&ML), SRM Institute of Science and Technology 2nd Year CGPA (1st Year): 9.53	2024-Present Chennai, India
XII, KENDRIYA VIDYALAYA SANGATHAN CBSE, PERCENTAGE: 91.4%	2022-2023 Lucknow, Uttar Pradesh
X, KENDRIYA VIDYALAYA SANGATHAN CBSE, PERCENTAGE: 93%	2020-2021 Angul, Odisha

EXPERIENCE

BrainMint Education Consultancy Frontend Developer Intern	May 2026 – Oct 2026 Remote
- Developed full-stack features working with cross-functional teams in an Agile environment - Participated in code reviews and contributed to codebase following company standard	
GirlScript Summer of Code Open Source Contributor	May 2026 – Present
- Contributed to 5+ open-source projects across frontend development and UI/UX improvements, with 7 pull requests successfully merged into active repositories. - Ranked among the Top 1,000 contributors out of 42,000+ participants globally.	

SKILLS

Programming Languages: Python, Java, JavaScript, HTML, CSS, SQL
ML / AI Frameworks: PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, Streamlit
Web & Backend: Flask, Firebase, REST APIs
Developer Tools: Git, GitHub, VS Code, Git LFS

PROJECTS

Derma AI :Clinical Skin Lesion Detection <i>ResUNet, EfficientNet-B0, React, FastAPI</i>	Github
- Built a two-stage deep learning pipeline combining ResUNet segmentation (DSC: 0.9007) and EfficientNet-B0 classification (AUC-ROC: 0.9564) trained on 33K+ ISIC 2018 dermoscopic images with hybrid Dice+Focal loss to handle class imbalance - Optimised models to INT8 ONNX format (18.8 MB) achieving <2s CPU inference; deployed via FastAPI backend with CORS middleware, modular inference service, and structured JSON API - Developed a full-stack clinical dashboard in React + TypeScript featuring drag-drop image upload, real-time segmentation mask overlay, confidence scoring, and automated PDF report generation	
Veritas AI :Fake News Detection <i>BERT, TF-IDF, Streamlit, Git LFS</i>	Github
- Built dual-model classifier combining TF-IDF + PassiveAggressiveClassifier with fine-tuned BERT achieving high accuracy on 44K+ news articles - Deployed interactive Streamlit web app with Git LFS optimization for large model files	
AgriTech : Smart Crop Disease Detection <i>Python, Flask, Firebase</i>	Github
- Built a smart agriculture solution to help farmers detect crop disease and receive recommendations. - Used Python (Flask) and Firebase, integrated with a responsive frontend.	

CERTIFICATION

- Google GenAI 2.0 AIML learning track completion certificate
- AWS- Fundamental of ML and AI
- IBM - ML with Python
- Machine Learning - summer internship course associated with IIIT Allahabad
- ISRO IIRS - Geodata Processing using Python and ML

ACHIEVEMENTS & ACTIVITIES

- Advanced to Round 1 of **Google Big Code Challenge 2026**, competing among top 15,000+ participants nationwide in algorithm design and optimization.
- Qualified for Round 2 in **Flipkart GRiD 7.0** (2025) by solving complex problem statements in data structures and system design
- Research team member in CINTEL Association SRM IST.
- Technical team Member of ISET SRM student chapter
